Creating
atmospheres

Our philosophy: *Creating atmospheres*

Foreword

Welcome to Sempre In & Outdoor Living ("Sempre"), where Belgian craftsmanship meets the beauty of natural, organic design. At Sempre, we are dedicated to designing and creating high-end indoor and outdoor furniture, glassware, and decorative items that exude elegance and sophistication. Each piece we offer embodies a unique look and feel—what we proudly refer to as the "Sempre vibe."

Our success is driven by a team of creative and innovative minds with extensive experience in the industry. Their passion for design and commitment to sustainability allow us to craft pieces that are not only functional but also transformative, setting the stage for inspiring atmospheres and memorable experiences. Whether you are curating a retail space, enhancing a hospitality environment, or elevating your home, our collections are designed to infuse any setting with a sense of natural beauty and timeless style. As you explore this catalogue, you will discover the distinct charm and earthy appeal of our products, each meticulously crafted to enhance the organic elegance of your space.

We invite you to immerse yourself in the world of Sempre, where every piece tells a story of nature, craftsmanship, and a commitment to sustainable excellence.

Let's create perfect atmospheres to share great moments with customers, friends and family.

Our vision & strength

Sempre's vision transcends traditional design. We are Creators of Atmospheres, crafting environments that resonate emotionally and leave lasting impressions. Our philosophy blends natural and organic elements with rigorous attention to detail, creating spaces that captivate and support the aspirations of our clients.

This vision is reflected in all our collections, crafted to harmonize natural beauty with meticulous attention to detail.

At Sempre, our strength lies in our ability to create a vibe with sustainable and luxurious products. Our products are not only designed to be aesthetically pleasing but also to stand the test of time, both in terms of durability and style. This unique blend of eco-friendliness, quality, and timeless design makes us the go-to choice for discerning clients.

Inspiration

How it's made

Our furniture is a testament to the harmonious blend of sustainability, craftsmanship, and timeless design. Each piece begins its journey as reclaimed teak or oak, salvaged from old houses, bridges, boats, and railway sleepers, some of which have stood the test of time for over 80 years. By repurposing these seasoned materials, we not only give them a second life but also reduce the demand for new timber, allowing the world's forests to regenerate and thrive. Quality and timeless design make this collection the go-to choice for discerning clients.

Teak, with its legendary durability and resistance to decay, is a material of remarkable resilience. The reclaimed teak we use retains the same high quality as freshly cut wood,

making it an ideal choice for furniture that is built to last. Every scratch, groove, and patina on the surface of the wood tells a story of its past, infusing each piece with a sense of history and character that is impossible to replicate with new materials.

In addition to wood, rattan is also incorporated into the designs, a natural and sustainable material that complements the rustic elegance of reclaimed timber. The rattan used is untreated, retaining its natural light brown hue, which adds warmth and texture to the furniture. Whether woven into the seats of chairs or used to create intricate patterns on cabinet doors, rattan brings a touch of nature indoors, enhancing the organic beauty of the designs.

Glassware & decoration

Inspiration

How it's made

At Sempre, our glassware is a celebration of European craftsmanship, meticulously handcrafted to create pieces that are both functional and beautiful. Each item is made in Europe by skilled artisans who bring years of experience and dedication to their craft. Our glassware is handblown, ensuring that every piece is truly unique.

The process begins with the selection of premium raw materials which are melted at extremely high temperatures to form molten glass. This molten glass is carefully gathered onto a blowpipe, where our artisans skillfully hand blow each piece, shaping it with precision and care. This intricate process requires both technical expertise and a deep understanding of the material, allowing the glass to take on its final form while still pliable.

After the initial shaping, the glassware undergoes a slow cooling process in an annealing oven, which ensures its strength and durability. Once cooled, each piece is further refined through a hand-cutting process. This final touch, performed by our master craftsmen,

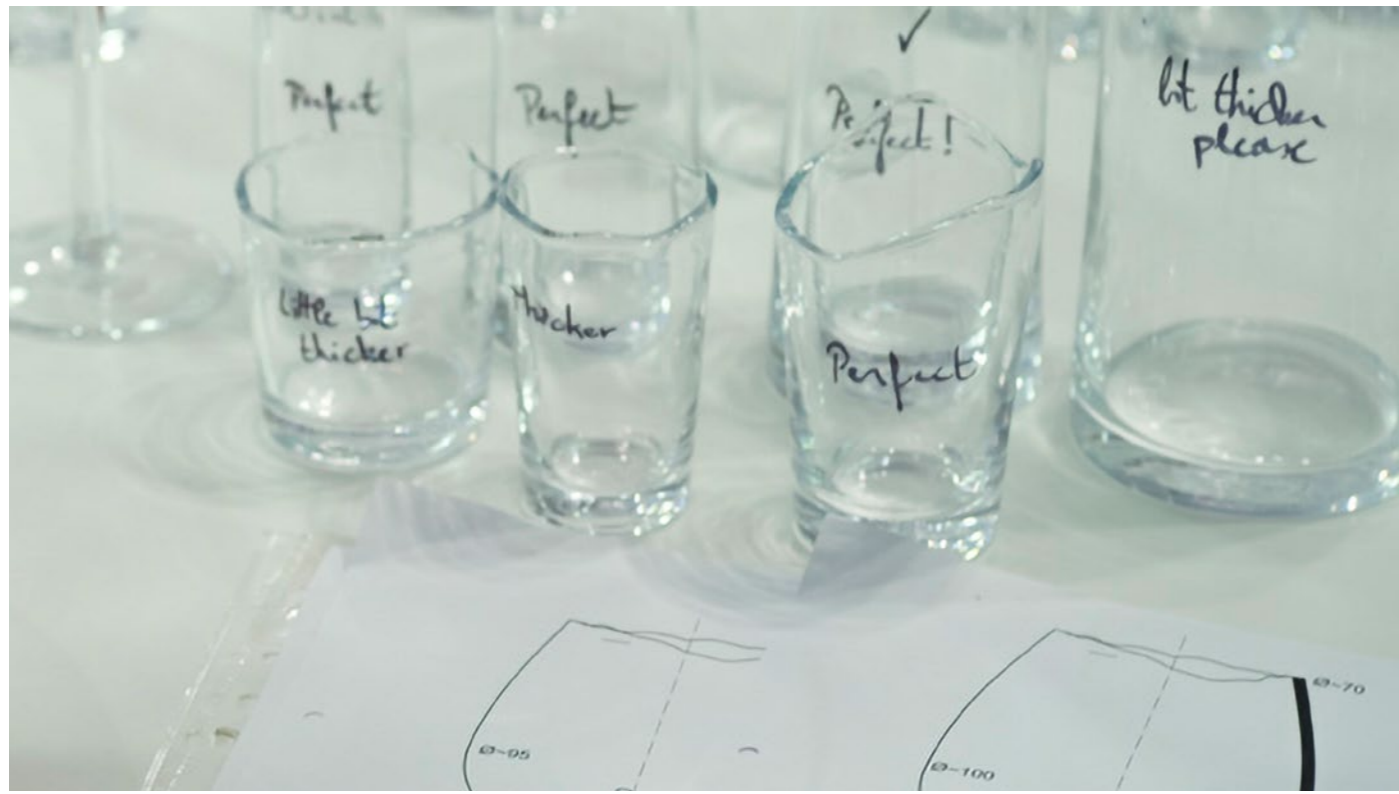

involves carefully cutting the glass to create a naturally formed rim. This hand-cutting results in a rim that is unique to each piece, adding to the individuality and charm of the glassware.

The subtle variations in thickness, texture, and the naturally formed rim are not just characteristics but the hallmarks of handcrafted excellence. These details make every piece of Sempre glassware one-of-a-kind, offering a distinctive touch that enhances the beauty of any setting.

We believe that our glassware should do more than serve a function—it should tell a story of European artistry, tradition, and timeless elegance. Each piece, with its handblown form and hand-cut rim, is a testament to the care and skill that goes into every step of our process.

Please be advised that the images included in this catalogue are for reference only. As our glassware is handcrafted, there may be differences in colors, shapes, and textures in the final products.

Our lavastone products are meticulously crafted from volcanic rock, a material celebrated for its durability and distinctive texture. The creation process begins with the careful selection of premium lava stone, chosen for its strength and natural aesthetic appeal. Skilled artisans then shape the stone by hand, chiseling and carving it to achieve the desired form, ensuring that each product is truly one-of-a-kind with its own unique character.

After the initial shaping, the lava stone is refined and polished to reveal its inherent beauty. One of the most captivating aspects of lava stone is its natural variation in color depth. This variation is influenced by several factors: the original temperature of the lava when it

solidified, the amount of rain that fell during the cooling process, and the length of time the lava took to dry. These elements combine to create a rich, dynamic palette of colors and textures, making each product a unique work of art.

Designed to withstand the elements, our lava stone products are perfect for both indoor and outdoor use and add a timeless, natural elegance to any setting.

Please be advised that the images included in this catalogue are for reference only. As our products are handcrafted, there may be differences in colors, shapes, and textures in the final products.

Our ceramics ('Gres') embody the essence of European craftsmanship and timeless refinement. Produced in the EU by skilled artisans, each piece is thoughtfully created to combine functional beauty with a distinctive, elevated character.

Crafted from carefully selected materials, our ceramics go through a meticulous process of shaping, glazing, and firing, where expertise and attention to detail are present in every stage. This artisanal approach allows each

object to develop its own subtle nuances in texture, tone, and finish, giving every piece a unique identity. These variations are the hallmark of true handcrafted excellence. Rather than imperfections, they reflect the authenticity, artistry, and human touch that define the Sempre collection.

Please note that the images included in this catalogue are for reference only. As our ceramics are handcrafted, slight variations in colour, shape, texture, and finish may occur in the final products.

Lighting

Inspiration

Beefbar Greece designed by Cédric Capron

How it's made

The Lighting collection is shaped by a thoughtful approach to material, form, and reuse. Each lamp is created with the intention to go beyond illumination, transforming familiar materials and objects into atmospheric light sources with character and depth. Craftsmanship, sustainability, and material honesty lie at the core of the production process, resulting in lighting pieces that feel natural, tactile, and timeless.

One of the defining elements within the collection is the use of reclaimed and repurposed materials. Objects originally designed for a different purpose are carefully reinterpreted and given a second life as lamps. By reworking existing forms and materials, the collection embraces imperfection, history, and authenticity, allowing each piece to carry its own story while serving a new function.

Alongside repurposed elements, natural materials play a central role. Terracotta, crafted in Portugal by skilled artisans, is shaped by

hand and fired using traditional techniques. The materials earthy texture, subtle color variations, and organic surface give each lamp a warm, grounded presence. Small differences in tone, form, and finish are inherent to the process and ensure that no two pieces are ever exactly alike.

Another distinctive material used within the Lighting collection is reclaimed fishing net, sourced from Portuguese fishermen. These nets are carefully selected and cleaned before being woven by hand into lamp structures. This process transforms discarded material into expressive lighting pieces, while supporting a circular economy and reducing environmental waste. The woven textures introduce softness and rhythm, creating a warm and diffused light effect.

Please note that the images included in this catalogue are for reference only. As all lamps are handcrafted and made from natural or reclaimed materials, variations in color, texture, and form may occur in the final products.

Throughout the production process, artisans work with respect for the material and its origin. Whether shaping terracotta, weaving reclaimed fibers, or adapting existing objects into new forms, each lamp is assembled by hand with attention to balance, proportion, and atmosphere. The result is a collection of lighting pieces that feels both refined and raw, functional yet expressive.

Designed for both residential and hospitality environments, the Lighting collection brings warmth, texture, and calm to a space. Each lamp is not only a source of light, but an object that contributes to the overall atmosphere, inviting slower moments and a more tactile experience of living.

Materials

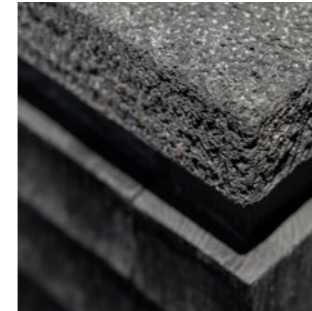

The materials we choose are not merely functional elements; they are the essence of the story each product tells and are integral to the distinctive Sempre vibe. Every material carries with it a unique history, a distinct texture, and a natural beauty that we carefully honor. These materials form the foundation of each piece, contributing to the atmosphere that Sempre strives to create, an environment that feels both grounded and inspired.

Our approach to materials is rooted in the belief that they should reflect both their journey and their potential, embodying the timeless elegance and authenticity that defines the Sempre brand. Whether we leave the stone in its natural state to celebrate its raw elegance or select wood that showcases its grain and depth, each choice enhances the cohesive, organic atmosphere that is central to the Sempre experience. The materials inherent qualities not only give each piece its true character but also play a crucial role in crafting spaces that resonate with the quiet sophistication and enduring beauty Sempre is known for.

Lighting

At Sempre, the finishes we apply are integral to the character and beauty of each piece. The Fumé finish, for instance, lends a rich, smoky depth that imbues the material with an elegant, aged appearance. In contrast, the Mud finish emphasizes the natural grain and texture, bringing out an earthy, organic warmth that feels both grounded and inviting.

Our Wax finish enhances the natural luster and durability of the material, giving it a soft, polished look that highlights its rich color and texture. For those who prefer a more contemporary feel, the Cadré finish offers a structured, refined appearance, emphasizing clean lines and modern sophistication.

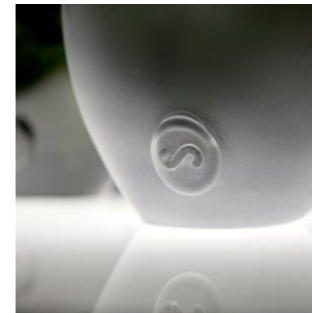

Finally, the Linié finish focuses on the natural lines within the material, adding depth and highlighting its intrinsic beauty. Each of these finishes is carefully applied by our artisans, transforming each piece into a unique work of art that enriches your space with its distinct character and craftsmanship.

Good to know

Our catalogue showcases a selection of standard materials and finishes, with a curated range of additional options available upon request. If you have a specific concept in mind, we welcome you to share your vision, and we will work with you to tailor it within the parameters of our available customization and production options.

For those seeking something truly unique, we invite you to explore our "Bespoke Items and Projects" catalogue, which offers a carefully curated set of new textures and finishes. These options allow us to craft a distinctive, handcrafted piece that aligns with your preferences, while staying within our established design framework.

Please note that the images included in this catalogue are for reference only. As many of our products are handcrafted and made from natural or reclaimed materials, variations in color, texture, and form may occur in the final

pieces. In terms of use, we clearly indicate when a product is specifically designed for outdoor environments. These products are constructed with features that enhance durability in various weather conditions, such as water drainage and material expansion. While these adaptations reduce the risk of weather-related damage, some natural wear over time is to be expected.

Our "Semi" category strikes a balance between indoor elegance and occasional outdoor use. Primarily designed for indoor settings, these items can also be used outdoors under favorable conditions, though they are not intended for prolonged exposure to moisture or direct sunlight.

To maintain their appearance and longevity, we recommend limited outdoor use, ideally in protected spaces like sunrooms or covered patios.

Care & Maintenance instructions

Scan the code for more information

Temperature Sensitivity: Hot vs. Cold

Our handblown glassware is crafted with the utmost care, making each piece a work of art. Unlike industrial glass, this type of glassware is sensitive to sudden temperature changes. Abruptly transitioning from hot to cold, or vice versa, can cause the glass to crack or break. While our standard (clear) finish is suitable for serving hot beverages, we advise against using other finishes for hot drinks to ensure the longevity of your glassware.

Handling with Caution

Certain items, such as glass tubes, candle holders, and antlers, are carefully glued onto their glass bases. Please be aware that these connections are sensitive to temperature fluctuations and may become detached. Always carry and support these items by their base—never lift them without ensuring the base is fully supported. If detachment occurs despite careful handling, you can easily reattach the pieces using a two-component glass-on-glass adhesive.

Candles

Due to the artisanal production, our candleholders never have the exact same diameter, so it might be necessary to size down the candle's diameter by hand. Don't let the candles burn too closely to the candleholder to prevent the glass from cracking.
